The Gerald J. Friedman TransGender Program for Health and Wellness

Lenox Hill Hospital's comprehensive medical services for the specialized needs of the transgender and gender non-conforming community.

We offer trans-affirmative medical care in a safe, non-judgmental environment. Our clinicians and staff provide primary care and hormone replacement therapy for pediatric, adolescent and adult patients in need of services. We encourage an ongoing relationship between patients and providers to address health and wellness needs. Achieving a full and enriched life is our goal.

Northwell Health opened The Gerald J. Friedman Transgender Program for Health and Wellness at Lenox Hill Hospital in the summer of 2016. Under the leadership of Leonid Poretsky, MD, Chief of the Division of Endocrinology, the center offers medical care in the New York metropolitan area for all transgender communities.

Values

- **Patient Experience:** always put our patients first
- **Integrity:** be professional, honest, and protect privacy
- **Teamwork:** work together and communicate effectively
- **Innovation:** initiate change and promote creativity
- **Caring:** be compassionate, respectful and supportive
- **Excellence:** pursue greatness with passion and quality

Transgender Health Services include

- Primary care
- Routine check-up and immunizations
- Assessment and maintenance of hormone replacement therapy
- HIV/AIDS testing
- Behavioral/mental health assessments and care
- Social work assistance
- Referrals to transgender related organizations and agencies for legal and other needs
- Medical care with specialists of the Northwell Health network of providers.
