Imbert Cancer Center

The future of cancer care is here – right on the South Shore
The future of cancer care is at Imbert Cancer Center.

**Multidisciplinary care in one building**
Consultations are now available with experts in the following cancer specialties:
- Medical oncology
- Radiation oncology
- Breast surgery
- Colorectal surgery
- Gynecologic oncology
- Surgical oncology
- Thoracic surgery

Plastic/reconstructive surgery and neurosurgery are available nearby. Interventional and diagnostic radiology is available next door at Northwell Health Imaging at Bay Shore.

Opened in fall of 2016, Imbert Cancer Center offers comprehensive cancer services specially designed with the needs of cancer patients and their families in mind. Our beautiful facility provides a comfortable, peaceful and private environment that is conducive to healing in every way.

Our cancer specialists are part of the Northwell Health Cancer Institute, one of the largest cancer programs in the area – giving you easy access to a broad range of specialized treatments. In addition, our experts are members of Northwell Health Physician Partners, a group of dedicated Northwell Health physicians who work together in over 100 specialties.

**A multidisciplinary team - working with you and for you**
When you visit Imbert Cancer Center, you or your loved one will receive care from a team of specialists with expertise in diagnosing and treating cancer. Our care team meets regularly to discuss diagnostic and treatment options for select cases, giving you the benefit of a combined recommendation from a diverse team. Together, your care team will develop a treatment plan to achieve the best possible outcome for you.
Specialized care at Southside Hospital

Should you need surgery, Southside Hospital is conveniently located nearby and closely integrated with Imbert Cancer Center. Southside Hospital has been designated as a Comprehensive Community Cancer Program by the Commission on Cancer and as a Center of Excellence in Robotic Surgery from the Surgical Review Corporation (SRC).

Cancer patients in the community who require surgery or hospitalization can receive care 24 hours a day, 7 days a week from Southside Hospital’s specially trained oncology staff. In addition, cancer patients in need of emergency care can visit Southside Hospital’s new 30,000 square foot Emergency Department. Our cancer patients with lowered immune systems can present a special card and quickly move to a more private area, where emergency medicine physicians can access their complete medical records to help ensure the most appropriate treatment.

Specialized cancer treatments and therapies now available

Medical oncology
– Chemotherapy
– Immunotherapy
– Hormone therapy
– Targeted therapies

Radiation medicine
– Intensity-modulated radiation therapy (IMRT)
– Stereotactic radiosurgery (SRS)
– Stereotactic body radiation therapy (SBRT)

Cancer support services every step of the way

We know your cancer treatment is a journey. That’s why we offer a variety of resources and cancer support services for our patients, right here on the South Shore – letting you stay close to home with friends and family when you need them most.

Support services at Imbert Cancer Center include:

– Nutrition counseling
– Social work
– Support groups
– Patient resource center
– Relationships with local organizations that offer additional support programs

New medical oncology patients also have access to an oncology nurse navigator, chairside scheduling and concierge outpatient specialty pharmacy services.

Nutritional counseling, social work and cancer screenings are also available at Southside Hospital.

Northwell Health Imaging at Bay Shore

Located next door to Imbert Cancer Center, Northwell Health Imaging at Bay Shore offers the most advanced and safest imaging techniques across a full range of imaging services, including:

– PET/CT
– SPECT/CT
– MRI
– Ultrasound
– Digital X-ray
– Interventional radiology/procedures

Comprehensive breast imaging services are also offered nearby.
Exceptional care for your cancer. Total care for you.

If you have cancer, it is important to have careful coordination between your cancer specialists and any other physicians involved in your care. When you leave your community to receive specialized treatment for cancer or a chronic condition like heart disease or diabetes, fragmented care can occur.

That’s why our top-notch cancer experts work closely with local cardiologists, endocrinologists, and other experienced specialists to carefully coordinate your cancer treatment and manage any other conditions you may have. Our team of experts and connected hospitals share an electronic medical record to seamlessly care for all your health needs, right here in your community.

Conditions we treat

We treat virtually all types of cancer, including (but not limited to):

- Brain tumors
- Breast cancer
- Colon and other gastrointestinal cancers
- Gynecological cancers
- Head and neck cancers
- Hematologic cancers
- Lung cancer
- Melanoma and rare skin cancers
- Prostate cancer and genitourinary cancers
