Translational Research Training Fellowship Program in Medical Oncology and Laboratory Investigation

In conjunction with Cold Spring Harbor Laboratory, a National Cancer Institute-designated Cancer Center, the Don Monti Division of Medical Oncology, Department of Medicine of Northwell Health, is launching a new translational research track within its established medical oncology fellowship program. Promising candidates must have an MD or MD/PhD and have completed an ACGME accredited residency in internal medicine with a clear track record of academic promise, accomplishment and/or research training. The selected fellow will complete 1 year of formative clinical and clinical research training in medical oncology, followed by 2 or more years of postdoctoral basic or translational research training at Cold Spring Harbor Laboratory. Training will include didactic courses, structured career development activities, research seminars, hands-on research training in CSHL laboratories, clinical laboratory rotations, ambulatory and inpatient multidisciplinary clinical management training, and participation in clinical and translational research by program mentors with national reputations on both campuses. Following completion of this fellowship the candidate will be board-eligible for the ABIM medical oncology examination.

The Monter Cancer Center of the Northwell Health Cancer Institute is the principal site for the clinical fellowship training, located in Lake Success, New York. Additional onsite services include radiation oncology, surgical oncology, urology, neuro-oncology, dermatology and imaging services. Located on the North Shore of Long Island, Cold Spring Harbor Laboratory is a world-renowned private, not-for-profit research and education institution leading in the fields of cancer, neuroscience, plant and quantitative biology and genomics.
